

Kid's STEAM

Bouncy Balls

Supplies Needed

- 1/2 Cup of Warm Water
- 1 TBSP of Borax
- 1 to 2 TBSP of Glue (We suggest the glitter glue!)

Instructions

- ✓ **Step One:** Make Borax solution by stirring together the 1/2 cup of warm water and 1 tablespoon of Borax until it has completely dissolved.
- ✓ **Step Two:** Slowly pour 2 tablespoons glue into the bowl of Borax solution.
- ✓ **Step Three:** Once hardened, remove from the Borax solution and roll between your hands to make a ball shape.

Note: The glue is going to go hard, not the Borax solution. You will be left with a bowl of the solution.
